

Class of 2016,

My name is Zev Greenberg and I am running for the position of class senator. I want to make sure every student, regardless of his or her involvement, is heard by our student government. So many people in our class have ideas of what could be improved around campus, but are unaware of how to make these changes occur. If elected as senator, I will make sure that the entire class of 2016 is represented in Student Senate.

I was a member of my high school's Student Council for four years, and senior year I was the school treasurer. I am confident when addressing peers and assertive when I feel that decisions are being made without thinking through all possible consequences. I plan to continue in this vein if elected into office.

I am a Chemistry and Biochemistry & Molecular Biology double major, which I believe will bring some new ways of thinking to our class's representation in Student Senate. I intend to use all of my resources as senator to improve every student's experience during his or her time in school. I will work to the best of my ability, so that everyone can have a great junior year.

Thank you for your time and consideration,
Zev Greenberg
