KEY CODE

Fund code: This is the code used on Fidelity's automated phone lines to request transactions for the investment option. You will not need this code if you use the Internet to make transactions.

Ticker: This is also called the "trading" symbol for the fund. If the fund is listed and traded on any of the major exchanges, this is the code that is used to identify the fund.

Fidelity Freedom® Income Fund

Fund Code: 00369

Ticker: FFFAX

Objective: Seeks high total current income and, as a secondary objective, capital appreciation.

Strategy: Investing in a combination of underlying Fidelity domestic equity funds, international equity funds, bond funds, and short-term funds. Allocating assets among underlying Fidelity funds according to a stable target asset allocation of approximately 17% in domestic equity funds, 7% in international equity funds, 46% in bond funds, and 30% in short-term funds.

Risk: The fund is subject to the volatility of the financial markets, including that of equity and fixed income investments. Fixed income investments entail issuer default and credit risk, inflation risk, and interest rate risk (as interest rates rise, bond prices usually fall and vice versa). This effect is usually more pronounced for longer-term securities. Principal invested is not guaranteed at any time, including at or after retirement.

Short-term Redemption Fee Note: None

Who may want to invest:

- Someone who is seeking an investment option intended for people in retirement and who is willing to accept the volatility of diversified investments in the market.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option and looking primarily for the potential for income and, secondarily, for share-price appreciation.

Footnotes: A mutual fund registered under Fidelity Aberdeen Street Trust, and managed by Strategic Advisers, Inc. This description is only intended to provide a brief overview of the fund. Read the fund's prospectus for more detailed information about the fund.

Fidelity Freedom® 2005 Fund

Fund Code: 01312

Strategy: Investing in a combination of underlying Fidelity domestic equity funds, international equity funds, bond funds, and short-term funds. Ultimately, the fund will merge with Fidelity Freedom Income Fund. Strategic Advisers may continue to seek high total return for several years beyond the fund's target retirement date in an effort to achieve the fund's overall investment objective.

Objective: Seeks to provide high current income, consistent with preservation of capital and liquidity.

Strategy: Invests in U.S. dollar-denominated money market securities of domestic and foreign issuers and repurchase agreements, and also may enter into reverse repurchase agreements for the fund. Invests more than 25% of total assets in the financial services industries. Investing in compliance with industry-standard requirements for money market funds for the quality, maturity, and diversification of investments.

Risk: *An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.* The rate of income will vary from day to day, based on changes in interest rates and market conditions. Changes in government regulation and interest rates and economic downturns can have a significant negative effect on issuers in the financial services sector. Investments in foreign securities involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. A decline in the credit quality of an issuer or the provider of credit support or a maturity-shortening structure for a security can cause the price of a money market security to decrease.

- Someone who is seeking to complement his or her bond and stock fund holdings in order to reach a particular asset

Fidelity® Strategic Dividend & Income® Fund

Fund Code: 01329

Ticker: FSDIX

Objective: Seeks reasonable income. The fund will also consider the potential for capital appreciation.

Strategy: Normally investing at least 80% of assets in equity securities. Using a neutral mix of approximately 50% common stocks, 15% REITs and other real estate related investments, 15% convertible securities, and 20% preferred stocks. Investing the fund's assets with a focus on equity securities that pay current dividends and show potential for capital appreciation, which tends to lead to investments in "value" stocks in the common stock category.

Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Lower-quality bonds can be more

volatile and have greater risk of default than higher-quality bonds. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time.

Short-term Redemption Fee Note: None

Who may want to invest:

- Someone who is seeking to invest in a fund that invests in both stocks and bonds.
- Someone who is seeking the potential both for income and for long-term share-price appreciation and who is willing to accept the volatility of the bond and stock markets.

Fidelity® Total Bond Fund

Fund Code: 00820

Ticker: FTBFX

Objective: Seeks a high level of current income.

Strategy: Normally investing at least 80% of assets in debt securities of all types and repurchase agreements for those securities. Using the Barclays U.S. Universal Bond Index as a guide in allocating assets across the investment-grade, high yield, and emerging market asset classes. Investing up to 20% of assets in lower-quality debt securities. Managing the fund to have similar overall interest rate risk to the index. Investing in domestic and foreign issuers. Allocating assets across different asset classes, market sectors, and maturities. Analyzing the credit quality of the issuer, the issuer's potential for success, the credit, currency, and economic risks of the security and its issuer, security-specific features, current and potential future valuation, and trading opportunities to select investments. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default), options, and futures contracts - and forward-settling securities, to adjust the fund's risk exposure. Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. Leverage can increase market exposure and magnify investment risk.

Short-term Redemption Fee Note: None

Who may want to invest:

- Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.
