# **PowerPoint 2013: Inserting Audio**

PowerPoint allows you to add **audio** to your presentation. For example, you could add **background music** to one slide, a **sound effect** to another, and even record your own **narration** or **commentary**. You can also add audio to play across you entire presentation.

You can add sound **from a file** on your computer or browse PowerPoint's collection of **clip art audio**. You can then **edit** the audio to customize it for your presentation.

#### To insert audio from a file:

1. From the Insert tab, click the Audio drop-down arrow, then select Audio on My PC.

2. Locate and select the desired audio file, then click Insert.

3. The audio file will be added to the slide.

### To insert clip art audio:

1. From the Insert tab, click the Audio drop-down arrow, then select Online Audio.

2. The Insert Audio dialog box will appear. Enter a search term in the box.

- 3. Press the Enter key on your keyboard. The results will appear in the dialog box.
- 4. You can click to **preview** an audio file. Select the **audio file** you want to use, then click **Insert**.

Drum Roll Clash 1 item selected. Insert Cance 0.02	

5. The audio file will be added to the slide.

# Recording your own audio

Sometimes you may want to **record** audio directly into a presentation. For example, you might want the presentation to include **narration**. Before you begin, make sure you have a **microphone** that is compatible with your computer; many computers have **built-in microphones** or ones that can be **plugged in** to the computer.

#### To record audio:

1. From the Insert tab, click the Audio drop-down arrow, then select Record Audio.

2. Type a **name** for the audio recording, if desired.

3. Click the **Record** button to start recording.

4. When you're finished recording, click the **Stop** button.

5. To preview your recording, click the **Play** button.

6. When you're done, click **OK**. The audio file will be inserted into the slide.

# Working with audio

## To preview an audio file:

- 1. Click an audio file to select it.
- 2. Click the **Play/Pause** button below the audio file. The sound will begin playing, and the **timeline** next to the Play/Pause button will advance.

3. To jump to a different part of the file, click anywhere on the **timeline**.

#### To move an audio file:

• Click and drag to **move** an audio file to a new location on a slide.

#### To delete an audio file:

• Select the audio file you wish to delete, then press the **Backspace** or **Delete** key on your keyboard.

## **Editing audio**

You can modify your audio files using the commands on the **Playback** tab. For example, if you add a song to a slide you can **trim** it to play only a brief section. You can also add a **fade in** and **fade out**, and add **bookmarks** that allow you to jump to specific points in the audio file.

#### To trim an audio file:

1. Select the audio file, then click the **Playback** tab on the Ribbon.

2. Click the Trim Audio command.

3. A dialog box will appear. Use the **green handle** to set the **start time** and the **red handle** to set the **end time**.

00:13.859 文		00:47.090 + <u>E</u> nd Time OK Cancel

4. To preview the audio file, click the **Play** button.

5. Adjust the handles again if necessary, then click **OK**.

#### To add a fade in and fade out:

- 1. On the Playback tab, locate the Fade In: and Fade Out: fields.
- 2. Type in the desired values, or use the **up** and **down** arrows to adjust the times.

#### To add a bookmark:

1. Click the **timeline** to locate the desired part of the audio file.

2. From the **Playback** tab, click the **Add Bookmark** command.

3. The bookmark will appear on the timeline. Click the bookmark to jump to that location.

#### **Audio options**

There are other options you can set to control how your audio file will play. These are found in the **Audio Options** group on the **Playback** tab.

🐴 🛂 Start: On C		Hide During Show
Volume Uop until S		Rewind after Playing
• <u> </u>	Audio Option	15

- Volume: Changes the audio volume.
- Start: Controls whether the audio file starts automatically or when the mouse is clicked.
- Hide During Show: Hides the audio icon while the slide show is playing.
- **Play Across Slides**: Continues playing the audio file across multiple slides, instead of just the current slide.
- Loop until Stopped: Replays the audio file until stopped.
- **Rewind after Playing:** Returns the audio file to the beginning when it is finished playing.

#### To change the audio icon:

By default, an audio file will appear as a **speaker icon** in the slide. If you want, you can change the icon to a different picture.

- 1. Select the audio file, then click the **Format** tab.
- 2. Click the **Change Picture** command.
