

My name is Sam Westcott and I am asking you to elect me as your Senator. I've held several positions within my high school student government including Freshman Class Representative, Sophomore Class Vice President, Junior Class Representative, and Senior Class Secretary. I also served as Vice President of my school's branch of the National Honor Society. Aside from student government, I was an active participant in my school's tutoring program where I tutored second graders at a nearby elementary school each week. I also served as an editor on the school newspaper. My participation in extracurricular activities allowed me to learn how to effectively balance the tasks with which I was posed, while simultaneously managing my schoolwork. In addition, I've grown quite accustomed to working with and around large groups.

By electing me, you would be electing somebody experienced with student-run government as well as somebody with a collaborative workstyle. You would be electing somebody who strives for excellence. I want the Student Senate to succeed and to be a positive organization that brings about positive change at the college. Moreover, I want to be a person whom you can come to with issues, ideas, or general concerns regarding the direction in which college policy may be going. I want to be there for *you*.

As a Senator, I would like to find myself engaged with all of my classmates in order to create a successful and inclusive atmosphere in which every person can flourish both academically and socially. I thank you for taking the time to read this letter and I very much hope to find myself working with you as your Senator.

Sincerely,

Sam Westcott

Class of 2020
