

Survey Population: Dickinson classes 1, 5 and 10-years after graduation.

Frequency and Method: Administered online annually throughout the summer months.

Affiliations: None. There are alumni surveys available from AICUP, HEDS and others however; the benefits of implementing one of these surveys do not outweigh the benefits of our own, free survey from which we have established longitudinal data.

Description: The online survey asks recent graduates about their current academic and employment status. The details for the academic portion include part-time or full-time status, where they have attended school since graduation, what they are studying, and what if any degrees they have completed. For the employment section we gather information on the part-time or full-time status, the business sector, position title, salary, company information and what sources (if any) they used to acquire their current position (i.e. alumni contact, job fair, Handshake, etc.).
