2	Foundations of Environmental Science Humanities/Arts & Environment	Society & Environment Applications of Environmental Science

- 3 Applications of Environmental Science
Applications of Environmental Science
Additional major course
- 4 Applications of Environmental Science ENST 406
Applications of Environmental Science Additional major course
Additional major course

B.S. Environmental Science (starting in 2nd year)

Yr	Fall semester	Spring semester
1	Foundations of Environmental Science	Foundations of Environmental Science
2	ENST 161 Humanities/Arts & Environment	ENST 162 Society & Environment Applications of Environmental Science
3	Applications of Environmental Science Applications of Environmental Science Foundations of Environmental Science	Additional major course
4	Applications of Environmental Science Applications of Environmental Science Additional major course	ENST 406 Applications of Environmental Science

Notes:

1. For students that begin Environmental Studies or Environmental Science in their second year it is possible to complete the major. In fact, many students go on and do it.
2. A significant majority of our Environmental Studies and Environmental Science students, go abroad for part or all of their junior year. Foundations of Environmental Science, Applications of Environmental Science, Environmental Studies Specializations and Humanities/Arts & Environment can be earned at programs abroad. Generally, 1-3 abroad credits come back and count toward the major.
