

Regional Math Science Center Summer 2020 Staff Positions - Maryland

We are searching for summer staff members for our Regional Math Science Center (RMSC) Summer 2020 Program, and I ask that you share this opportunity with any undergraduate and graduate students who have interests in working with youth to explore science research. See separate job descriptions for three of our summer positions: Science Teachers, Tutor Counselors and Head Resident.

The RMSC is a TRIO Upward Bound grant program funded through the US Department of Education to help prepare and motivate high school students to pursue college degrees in math and science. Our students come from backgrounds where financial resources are limited and parents do not have college degrees. These students participate in a rigorous, 3- to 6-week, summer residential program that focuses on conducting scientific investigations, and they present their scientific findings via a poster presentation.

Thank you for sharing this opportunity!

Sincerely,

Angela D. Ferguson
Assistant Director

Regional Math/Science Center
Frostburg State University
