2020 THE YEAR OF CARBON NEUTRALITY

Dickinson has met the challenge set forth in its Climate Action Plan and is on track to reach its goal of being carbon neutral in 2020. To be officially announced in April 2020, Dickinson will become one of just a few carbon-neutral college's in the nation. This means all of the activities included in the college's carbon footprint—such as heating and cooling the campus, use of vehicles and air travel—will add zero net emissions of greenhouse gases to the atmosphere.
