

In our community, thousands of seniors and individuals with intellectual and physical disabilities rely on compassionate caregivers and direct support professionals. Join our team and be one of these heroes that enable our participants to live independently in the peace and comfort of their own homes. You make it possible for them to remain at home instead of being forced to move into a facility or residential setting.

Our caregivers and direct support professionals teach and assist with the necessary tasks to keep our participants independent (light housekeeping, personal care, grocery shopping and social outings). During this time of isolation, you will be their link to the outside world and the bright center of their lives. MedStaffers offers competitive rates, flexible scheduling, health benefits and vacation pay. Become a hero and apply today by contacting Maria Davis at maria@medstaffers.net or by calling (717) 243-3485.
