## MAC OS – Connecting to Your Network Folder

1. From the Go menu in the Finder, select Connect to Server.

Ś	Finder	File	Edit	View	Go	Window	Help

		Y
Remove	) (	Browse Connect

3. If you are logged into a Dickinson-owned computer, the folder may open automatically. If not, keep following these directions to log in.

4. If a login window appears, choose Connect as a **Registered User**. Enter your Dickinson username and network password.

Then click Connect.

	Remember password in keychain			
*	(Cancel) (Connect)			

5. The **Students** network volume should then open. Find the folder with the first letter of your username, and open it.

(The **Students** volume icon will also appear on your desktop.)

Students

6. Then open the folder for your username.

7. In your personal folder, you have a **private** folder and a **public** folder. Only you can access your private folder, but everyone on ResNet can access your public folder.

8. To disconnect the volume (log off), simply drag the Students volume to the trash. The trash icon will change to a 'Disconnect' icon.
