PROJECT DESCRIPTION

Lonna M. Malsheimer received her Ph.D. from the University of Minnesota and is Professor of American Studies at Dickinson College. In the months following the Three Mile Island nuclear accident on March 28, 1979, Professor Malsheimer, with the help of Professors Melissa Kassovic, Julius Kassovic and Daniel Bechtel, conducted research and interviews of the Carlisle public. The general aim of the project was to discover the public reaction and personal feelings towards the nuclear accident. Those interviewed included people in the Carlisle community, workers in various county offices, the staff of local hospitals, students in the local public schools, as well as Dickinson College staff, professors, administrators, and students. This research was conducted in the form of interviews, which have been transcribed and are also contained on 293 cassette tapes. The other interviewers involved in the project consist of Dickinson College students and other volunteers: Sara Barakat, Darell Chao, Steven Devlin, Karen Diemer, Michelle Erich, Janet Gould, Janet Grant, Lyle Herr, Anna Herrmann, Bob Hupp, David Kloss, Chris Leister, Bill Lemuer, Tim Longwill, Mary Otey, Terry Rasch, Wayne Reynolds, Gail Robinson, Beth Sandbauer, Martha Thompson, Ken Williams and Robin Wilson.

COLLECTION DESCRIPTION

The Lonna Malsheimer collection consists of assorted newspaper articles, transcripts of interviews and audiotapes collected during her work with various other Dickinson College professors concerning the public reaction to the Three Mile Island accident on March 28, 1979. The collection, composed mainly of interview tapes and transcripts, is divided into 3 series. Series 1 consists of 6 folders of TMI Resources, including a two-part history of Three Mile Island, information on Ionizing Radiation, and a sample letter for the project "Remembering Three Mile Island." Series 2 consists of 427 interview transcripts, typed accounts of TMI interviews conducted by the various interviewers named in the collection inventory. They are organized according to the original order of the audio tapes to which they correspond. Series 3 consists of 293 audio cassette tapes, which correspond with the interview transcripts.
